## **DETAILED ACTION**

Page 2

Examiner acknowledges Applicants' reply, filed March 31, 2006. Applicants' amendment cancels claims 21-41 and 48-61.

Currently, claims 42-47 are under examination.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### Specification

The disclosure is objected to because of the following informalities. Appropriate correction is required.

Throughout the specification, the recitation of "liquid-liquid" is indefinite. The identity of three liquid species belonging to "liquid-liquid-liquid" is not clear.

On p. 11, last paragraph, second sentence, the recitation of "the hollow fibre" lacks antecedent basis.

On p. 12, third paragraph, sixth sentence, the recitation of "The hollow fibre" lacks antecedent basis.

In the paragraph bridging pp. 12-13, second sentence, the recitation of "The hollow fibre" lacks antecedent basis.

Application/Control Number: 09/857,132 Page 3

## **Drawings**

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to for the following reasons:

In Fig. 4, the abbreviation "LLMBE" is not clear.

Claim Rejections - 35 USC § 112

Page 4

Claims 42-47 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting

essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01.

Specifically, the identity of objects and/or steps, if any, required for performing or establishing

"equilibrium" is not clear. Applicants' invention, as claimed, does not appear to set forth any cooperative

structural relationship between "membrane wall" and "acceptor solution", or whether a gradient is required

for establishing "equilibrium".

Claim 42 is further rejected under 35 U.S.C. 112, second paragraph, as being indefinite because the

passive voice recitation "equilibrium is established" is not clear. The identity of object(s) and/or step(s), if

any, required for performing "establishing" is/are not clear. Whether the objects and/or steps required for

"establishing" are coextensive with the objects and/or steps required for "stirring" is not clear.

Art Unit: 1641

Claim Rejections - 35 USC § 102

Claims 42-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Ross (US 3,429,785).

Ross describes a method comprising the steps:

(1) providing a first container (see Fig. 6, container comprising test solution 72) having a sample

solution (see Fig. 6, test solution 72) comprising a dissolved analyte (see Abstract, "ionic

species");

(2) providing a second container (see e.g., Fig. 1, ion sensitive electrode 20) with a membrane

wall (see e.g., Fig. 1, membrane 22) having fiber pores (see e.g., col. 5, lines 17-18, "porous

polyethylene");

(3) filling the second container with an acceptor solution (see e.g., Fig. 1, ion exchanger liquid

24);

(4) lowering the second container into the first container (see Fig. 6, container comprising ion

sensitive electrode 50);

(5) stirring the sample solution (see col. 8, lines 8-9, "[s]teady state conditions of potential were

established");

(6) removing analyte enriched acceptor solution (see col. 8, lines 10-11, "moving the electrode").

# Response to Arguments

In prior Office Action, claims 42-47 were rejected under 35 U.S.C. 102(b) as being anticipated by Sirkar *et al.* (US 5,637,224). In response, Applicants amend independent claim 42 to add, *inter alia*, the step of "lowering the second container into the first container with the sample solution therein". Applicants' amendment and related argumentation are fully persuasive and sufficient to overcome this rejection. Accordingly, this rejection is withdrawn. Applicants' argumentation on this issue has been rendered moot in view of the new ground(s) of rejection set forth, supra, *Claim Rejections - 35 USC § 102* in view of Ross (US 3,429,785).

Art Unit: 1641

Conclusion

Page 7

No claims are allowed at this time.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the

extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final

action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is

filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed

until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a)

will be calculated from the mailing date of the advisory action. In no event, however, will the statutory

period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be

directed to David J. Venci whose telephone number is 571-272-2879. The examiner can normally be

reached on 08:00 - 16:30 (EST). If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, Long Le can be reached on 571-272-0823. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.
